

PROBLEM STATEMENT 59- COMMUNITY LOST AND FOUND NETWORK**SRN: PES1UG24CS925****NAME: PRATHIKSHA B P****SECTION : I****LAB 1****REQUIREMENTS TABLE:**

REQ ID	TYPE	DESCRIPTION	PRIORITY	ACCEPTENCE CRITERIA	RATIONALE
FR-001	Functional	The system shall match newly logged 'Found Item' posts with active 'Lost Item' reports based on category, color tags, and location radius.	High	Pass: Match probability calculated and notification dispatched to potential owner. Fail: Incompatible item categories matched.	Core matching functionality that automatically connects finders and owners without manual searching.
FR-002	Functional	The system shall automatically extract visual tags (category, color, shape) and text tags (brand, distinguishing marks) from photos uploaded during a Lost or Found item post.	High	Pass: At least 3 relevant tags are generated and shown for user confirmation within 5 seconds of upload. Fail: No tags generated, or tags are unrelated to the item.	Automated tagging reduces manual data entry and improves the accuracy of downstream matching.
FR-003	Functional	The system shall allow a Finder/Owner to create a Lost Item Report or Found Item Post containing a photo, description, category, approximate location, and date.	High	Pass: Post is saved and appears in the user's activity list with a unique ID. Fail: Post is rejected due to a missing mandatory field.	Baseline data capture required before any tagging, matching, or verification can occur.
FR-004	Functional	The system shall allow a Finder to set one or more private proof-of-ownership	Medium	Pass: At least one question-answer pair is stored and	Enables the secure ownership

		questions and answers when submitting a Found Item post.		hidden from public view on the listing. Fail: Post is published with no verification question set.	verification required by NFR-001 before contact details are shared.
FR-005	Functional	The system shall allow a Community Admin to review, flag, or remove listings reported as suspicious, duplicate, or fraudulent.	Medium	Pass: A flagged listing is hidden from public search within 1 minute of the admin action. Fail: Listing remains publicly visible after a removal action.	Maintains trust and safety of the community network by giving admins moderation control.
NFR-001	Non Functional	Claimants must answer private security questions set by the finder before item handover contact details are revealed.	High	Pass: Benchmarking tests confirm target latency and security standards under simulated peak load.	Protects the finder's personal contact information from being exposed to non-owners.
NFR-002	Non Functional	The system shall return geo-proximity match results for a new Found Item post within 3 seconds when searching across up to 10,000 active Lost Item reports.	Medium	Pass: Load test with 10,000 active listings returns candidate matches in under 3 seconds in 95% of trials. Fail: Response time exceeds 3 seconds.	Ensures the matching feature stays usable as the number of community listings grows.
